RP Witt Partners with Energy Star

June 2009

- RP Witt commits to building Energy Star Residential Projects.
- RP Witt has the experience and knowledge to assist from design through construction.
- RP Witt - The First in Florida to build an "Affordable" LEED Certified Home.
- Proud to be Building Sustainable Projects

RP Witt is excited about partnering with the Energy Star Program and the reduction of energy demands on our current infrastructure. As part of our commitment to green construction techniques we have made the decision to build using Energy Star approved products for our residential projects.

RP Witt has been green from the beginning and it's woven into our core fabric. We have completed 5 LEED Certified Homes in Jacksonville, FL and we were the first to build a LEED Certified home in Northeastern FL.

We're committed to recycling, energy efficiency, and reduction of water usage. So committed, in fact, that we've installed dual flush toilets in our offices, replaced all bulbs with energy star fluorescents and LED Lights, and we recycle at our offices.

Our goal is to reduce our carbon footprint as well as reduce the carbon footprint of others through education and implementation.
